ODF vs. OOXML: War of the Words

By Roy Schestowitz

Created 13/03/2014 - 6:01pm

Submitted by Roy Schestowitz on Thursday 13th of March 2014 06:01:34 PM Filed under LibO [1] OOo [2]

The story has other notable features as well: ODF is the first IT standard to be taken up as a popular cause, and also represents the first ?cross over? standards issue that has attracted the broad support of the open source community. Then there are the societal dimensions: open formats are needed to safeguard our culture and our history from oblivion. And when implemented in open source software and deployed on Linux-based systems (not to mention One Laptop Per Child computers), the benefits and opportunities of IT become more available to those throughout the third world.
