Submitted by Rianne Schestowitz on Tuesday 1st of April 2014 08:23:06 PM Filed under [Software](#) [1]

With the latest Git development work for the Elementary tool-kit and library, applications can run directly from the DRM driver interface without any display server / compositor / window manager. Applications can be created to run in DRM and by setting the ELM_ENGINE=drm option the apps will run in a standalone mode without anything else underneath.
