Stay tuned for the NVIDIA and Intel results that will accompany the AMD Radeon performance numbers in the days ahead. Overall, the Ubuntu 14.04 LTS open graphics experience is decent with Linux 3.13 and Mesa 10.2-devel although Linux gamers and enthusiasts are encouraged to either use the proprietary drivers or at least upgrade to the latest Linux kernel (3.14+) and Mesa 10.2-devel for the best OpenGL performance and best feature-set.
