Android 4.4.3, also known as KitKat MR2 (Android 4.4.1 and 4.4.2 are known as KitKat MR1), has entered the dogfooding stage and has started rolling out to 1% of Google employees outside of the Android team. Currently, the dogfooding rollout is limited to the supported Nexus line (Nexus 4, Nexus 5, Nexus 7 2012, Nexus 7 2013, and Nexus 10), with GPE and Moto X updates to follow.

The final public releases should be out in coming weeks. Unsurprisingly, the exact schedule is unknown at this point because it depends on the success of the dogfooding tests which will presumably first have to expand from the limited 1% to a larger portion of employees. The point is - don't expect an OTA just yet.
