Chromebooks are also getting support for folders in launcher. What it means is that now, like Android, you can create folders and club your apps in a much organized manner. Google has also implemented the 'OK Google' search feature with the launcher and the voice search can be triggered with hotword 'Ok Google'. Google has also implemented support for 'Captive Portal' which makes it easier for users when they try to connect to the wireless of cafes, hotels, airports, and other locations which requires them to go to an authentication page.
