Today's news hunt includes the news that Ubuntu 14.04 was released Friday. Also today is a review of AntiX, a lightweight SimplyMepis derivative, that I overlooked last week. In addition, Jesse Smith at Distrowatch.com reviews Robolinux 7.4.2, a distribution he describes as "Debian-based distribution which places strong emphases on user-friendliness and the idea that people should be able to easily migrate from Windows."
