Submitted by Rianne Schestowitz on Saturday 3rd of May 2014 06:09:09 PM Filed under [OSS](#) [1] [Gaming](#) [2]

There are many cool things happening in the world of Linux gaming, and Warsaw 1.5 is one of them. We have taken great care to make our latest release run smoothly on the open source radeon drivers, the input code utilizes XInput2, and our shipped binaries are fully compatible with Ubuntu 14.04 and Debian Wheezy.

Server hosts will be happy to hear that 1.5 features a built-in HTTP server that significantly simplifies map downloads by removing the need to serve downloadable files through mirrors.
