It is hard to keep up with the weather at times. If you are living in a place where the weather is unpredictable, knowing if it is going to rain or not makes a huge difference to you. That's why you need to keep yourself updated about the weather from time to time.

If you are using Ubuntu or other Linux distro, this isn't hard to do. Linux offers a plethora of options for users to keep an eye on the weather. Here is a selection of some of the best weather applications for your Linux desktop.
