Manjaro 0.8.10 has received its Update-Pack 1, getting regular kernel updates and latest upstream packages. This update adds some new Gnome3 packages, latest linux kernels, drivers and many updated applications needed for performing your tasks.

According to the official announcement available in the Manjaro blog, KF5 got updated to 4.100 version, the latest mesa 10.2.1 with a better working mhwid is included and the following kernels are supported.
