- [Curlew 0.1.22.3 Has Been Released](#) [2]

The open-source multimedia converter for linux Curlew has reached version 0.1.22.3 bringing some missing dialog icons, a "Português" "Brazil" translation and an updated russian translation.

Curlew is an open-source multimedia converter for linux with a support for more than 100 different file formats. It can also be used to add subtitles to your video file and show file informations such as duration, remaining time, estimated size, and progress value.

- [wc: Is there anything it can't count?!](#) [3]

- [wcalc: A calculator with a conventional appeal](#) [4]

- [Twilio and Google Mashup Optimizes Chromebooks for Call Centers](#) [5]

Twilio will depend on partners to bring Twilio CX to market. Customer service startup LiveOps has signed up as an early partner, leveraging the new solution for call centers. If other similar partners bite, Chromebooks could suddenly find a healthy new market in call centers.
