- [Open source tools: Five outstanding audio editors](#) [2]

Whether you're producing podcasts or creating highly sophisticated sound recordings, one of these open source apps will suit your needs.

- [xmlstarlet: A superstar for XML](#) [3]

- [xprobe2: What's it running ? probably?](#) [4]

- [Bonus: X is for extinct](#) [5]

- [Video Rippers and Transcoders](#) [6]

There are several programs for video ripping and transcoding in Linux, allowing to choose from a wide number of formats and containers for the output video files. This is an overview of six applications which allow you do transcode videos.

- [Mobile Phone Management Made Easy](#) [7]

Mobile phone users should not regard their computer only as the means of recharging their phone, or transferring files to and from the phone's storage. There's a lot more than you can do with your Linux box. This article illustrates some good open source tools that let you manage your mobile phone.
