- [IndieGoGo Find: Karma. Incarnation 1 for OS X, Windows, and Linux](#) [2]

- [GPU resolution scaling on external monitors with open source drivers](#) [3]

Linux seems to be finally becoming a viable gaming platform. That brings us into uncharted territories and we start to discover some deficiencies which were solved on other platforms a long time ago. One of those is GPU-based screen scaling.

- [A Variety Of Unreal Engine 4 Linux Demos Are Now Available](#) [4]

Linux developers and fans of Unreal Engine 4 have started offering compiled builds of several UE4 tech demos and some simple games for 64-bit Linux.

- [A Million Steam Keys up for grabs for Free from Bundlestars!](#) [5]

Lets? be honest, there?s a hidden child in every one of us that love Dinosaurs, be it the formidable Tyrannosaurus Rex or the mild Brontosaurus, we all have a dinosaur that we would love to have. Developers 800 North seems to have heard just that wish of us and brought it to reality with their Multiplayer shooter Dino D-Day. What?s more, Bundlestars have teamed up with PC Gamers to give away a million copies of the game on Steam for free!
