Deepin 2014 is the latest version of Deepin, a Linux desktop that's based on Ubuntu Desktop. Deepin 2014 is actually based on Ubuntu 14.04. It was released yesterday.

Deepin has always been on my list of the best desktop distributions, and Deepin 2014 just vaulted it to the top-2 of that list. The aim of this post is to show you why that happened and why I highly recommend that you should take Deepin 2014 out for a spin. I guarantee that you will like practically all it brings to the table.
