# Qt Creator 3.2 beta released

By *Rianne Schestowitz*

Created *08/07/2014 - 8:35pm*

Submitted by Rianne Schestowitz on Tuesday 8th of July 2014 08:35:07 PM Filed under [KDE](#) [1]

We are happy to announce the Qt Creator 3.2 beta today. So you can already check out the many improvements we have done for the upcoming 3.2 release, and, not to forget, give us feedback on what we have so far. We mostly concentrated on stability and improvements, so no completely new platform supported this time, sorry 😊. I'll randomly highlight some of the changes here, but you should probably check out our change log as well for a more thorough overview, and just download the binaries and try it for yourself.
