Submitted by Rianne Schestowitz on Saturday 12th of July 2014 12:10:50 AM Filed under [OSS](#) [1] [Drupal](#) [2]

A content management system (CMS is a computer application that allows publishing, editing and modifying content, organizing, deleting as

well as maintenance from a central interface. CMS?s are often used to run websites containing blogs, news, and shopping. Many corporate and marketing websites use CMS?s. CMS?s typically aim to avoid the need for hand coding, but may support it for specific elements or entire pages.
