With mid-term evaluations just around the corner for many technology-focused summer internship programs, here's a closer look at how the Google Summer of Code (GSoC) and Outreach Program for Women (OPW) are helping mentors as well as interns.

Xen Project virtualization is one of 40 open source projects involved in the OPW program run by the GNOME Foundation. This open source software is a Linux Foundation collaborative project that develops the Xen Hypervisor (for x86 and ARM), the XAPI toolstack, and the Mirage OS Cloud Operating system.
