- [Five must-know open source SDN controllers](#) [2]

Open source SDN controllers enable the testing of applications and the promotion of network virtualization and NFV. Check out five open source SDN controllers to know about.

- [Cloudwatt deploys open source SDN controller](#) [3]

French cloud service provider Cloudwatt announced that it has deployed open source SDN controller OpenContrail in its OpenStack-based datacentre in a bid to improve network operations and deployment speeds.
