What is more, whenever a new version of Ubuntu (the flavour of Linux I use) comes out, I can upgrade for free. I don't need to worry about ongoing license costs, because there are none. I will always have the most up to date version of the operating system and will never be in the position that the creators stop supporting my PC. Sorry Windows XP users, but it is true.

Would I say that Linux is right for everyone? No. However, you won't know unless you try.
