Submitted by Roy Schestowitz on Sunday 3rd of August 2014 11:07:20 PM Filed under [Software](#) [1]

- [VLC, the VideoLAN player, in version 2.1.5](#) [2]

The VideoLAN team released version 2.1.5 of their VLC player a while ago. The development of this versatile multimedia player has slowed down quite a bit as the team seems to have more focus on improving the OSX and Android versions (the previous release for Linux was almost half a year ago) so I was not really in a hurry to provide new packages.

- [The Best Lightweight Graphical Email Clients](#) [3]

Email remains the killer information and communications technology. Email volume shows no sign of diminishing, despite the increasing popularity of collaborative messaging tools.

Messages are exchanged between hosts using the Simple Mail Transfer Protocol with software programs called mail transfer agents, and delivered to a mail store by programs called mail delivery agents, frequently referred to as email clients.
