- [New Steam Client update: focus on Library and Steam UI](#) [2]

- [Ignition: A Social Retro Gaming OS for the Raspberry Pi](#) [3]

Ignition is a Social Retro Gaming "OS" for the Pi with features such as Gaming Achievements, Gamer Profiles, Online Play, more..

- [Cities Skylines, A City Builder Announced From Paradox & It's Coming To Linux](#) [4]

Linux is about to get a pretty deep and serious city builder courtesy of Paradox and Colossal Order named Cities Skylines. Check out the trailer and be amazed.

- [Valve Releases Major Steam Update with Upgrade Interface and Support for New Compilers](#) [5]

Valve has released a new major stable update for Steam, the developers have made quite a few improvements, and it's much more consistent than the previous versions.
