Submitted by Roy Schestowitz on Tuesday 19th of August 2014 07:38:55 AM Filed under [SUSE](#) [1] [Sci/Tech](#) [2]

Actually SUSE Linux began deployment at ESA in 2012 and has been continuing until now, the distro is used by 450 teams in the European Space Operations Centre at ESA, this includes being used by Mission Control Systems who are responsible for simulation and control of aircraft and satellites outside the atmosphere and further still.
