It's an obvious comparison: both Ubuntu and Superman are leaders, they are dependable, and they are arguably the most well known of their kind. Both are security minded and concerned with privacy, while Canonical's laser-like focus in pursuit of convergence is nearly as intense as the red-hot beam fired out of Superman's eyes!

Powerful, upfront and well intentioned (sometimes to a fault) the famous Linux distribution has much in common with

the most famous superhero of all time.
