- [Dota 2 In H1'2015 Will Receive Major Engine Update](#) [2]

While there's been signs for months that within Valve's Dota 2 game that it's transitioning from the Source Engine to Source Engine 2, it looks like Valve's next-generation game engine will be fully utilized within this multiplayer online battle arena game in 2015.

- [Enter the Gungeon Set To Release on PS4, PC, Mac and Linux in 2015](#) [4]

Enter the Gungeon was revealed earlier today at the Sony keynote. It is a brand new gunfighting dungeon crawler that is set to come out in 2015 for PS4, PC, Mac and Linux from Devolver Digital and the development studio Dodge Roll. Take on the role of one of several Gungeoneers, each haunted by their past and looking for a brighter tomorrow, as you Enter the Gungeon. Set your sights on the Cult of the Gundead as you blast through hand-designed chambers of the Gungeon's constantly evolving labyrinth of firepower.

- [The Developer Of 'Pixel Piracy' Has Announced New Mystery Game](#) [5]

One of the developers have confirmed that the new game will be available for Linux...

- [Valve Fixes Steam for Linux Game Broadcast with New Update](#) [7]

Valve has released a new Beta version of the Steam client, and the developers have fixed a number of problems, especially for the newly added Broadcast feature that is still far from working properly.

- [Desura's Linux Client Will Finally See An Update Soon](#) [8]

Looks like Bad Juju's acquisition of Desura will pay off for us Linux gamers soon. They tweeted to let people know the Desura client updates are currently in testing!

- [Minimalist Platformer '6180 The Moon' Available For Linux](#) [9]

The platformer from developer Turtle Cream has some very interesting mechanics and a beautiful soundtrack and is a welcome addition to our platform for fans of the genre. It has been available for Linux since 24th November according to the official announcement on Steam, but we would have missed it had it not been for a tip from a reader.
