Atleast once in life, most of us do wrong with the important data on our computer and then we think we must not have deleted this, whether some important documents or lectures' videos or bunch of important projects. Instead of cursing yourselves for such a foolish mistake, let's do some work. Let's try to recover that deleted data out from our HD. Here I am reviewing 5 of the **best Data recover tools** that can help recovering deleted data on **Linux**.
