The desktop is full of eye candy. It enhances the visual experience and, in some cases, can also increase functionality of software. But it also makes software fun. Working on the command-line does not have to be always serious. If you want some fun on the command-line, there are lots of commands to raise a smile.

Linux is a fun operating system. Linux offers a vast collection of small open source utilities that perform functions ranging from the obvious to the bizarre. It is the quality and selection of these tools that help Linux stand out. Check out these 7 small utilities.
