The OpenELEC team is proud to announce the fourth beta of OpenELEC 6.0 (v5.95.4)

The most visible change is Kodi 15.1 (Isengard). Beginning with Kodi 15.0 most audio encoder, audio decoder, PVR and visualisation addons are no longer pre-bundled into OpenELEC but can be downloaded from the Kodi addon repo if required. PVR backends such as VDR and TVHeadend will install needed dependencies automatically. For further information on Kodi 15.1 please read <http://kodi.tv/kodi-15-1-isengard-maintenance-release/>.
