- [IBM adds Java to Bluemix for open source agility](#) [3]

IBM has made improvements to a set of services available through its cloud platform Bluemix, with the aim of enabling developers to integrate Java-based resources into their cloud-based applications.

With the new IBM Cloud tools, developers will be able to broaden the capabilities of their applications by utilising additional security and flexibility, providing users with a more robust cloud experience.

- [NCI launching new computing courses with IBM partnership](#) [4]

IBM is partnering with the National College of Ireland as part of its Academic Initiative for Cloud programme which will train new developers.

NCI is one of more than 200 colleges and universities globally that are developing new curricula using IBM's Bluemix development platform.
