After just a few months, we're excited to announce a major upgrade for elementary OS Freya! This new version 0.3.1 closes about 200 reports and brings new features, tons of fixes, better hardware support, visual polish, and enhanced translations.

We're very proud to share some elementary OS download stats as well! So far, elementary OS has been downloaded an estimated 5 million times. Of those downloads, we're seeing that almost 70% are coming from Windows and OS X. So, "Welcome and congratulations!" to the over 3 million new users of an open source operating system!
