- [September updates for Adobe Flash](#) [2]

- [Second Plasma 5 update for September](#) [3]

The previous update was targeted for August but due to the difficulties I had in compiling all packages, that release slipped to early September. That is why I can announce a second September release for my KDE 5 packages for Slackware. The KDE 5_15.09_02 update contains all new software: Frameworks 5.14.0, Plasma 5.4.1 and Applications 15.08.1.
