- [Does job vacancy posting point to Elite: Dangerous Linux version?](#) [2]

A recent job vacancy posting at Frontier Developments may be a signal that a Linux port of Elite: Dangerous is in the offing. Both TweakTown and Softpedia reckon the job vacancy advert might give away Frontier's intentions of creating a Linux port of its premier open-world Space exploration and adventure games title.

- [Freedom Planet 2 is Announced for PC, Mac, and Linux](#) [3]

Independent developer Galaxy Trailer has announced Freedom Planet 2, a follow-up to their iconic and throwback platforming game.

The developer said the game will follow a similar release schedule as the first game, meaning it will launch for PC, Mac, and Linux first, followed by Nintendo platforms, as well as potentially more platforms, ?depending on resources.?

Most of the voice cast and characters from the original game are returning in the sequel, however the above trailer definitely gives more insight as to what you can expect in the new game.

- [OpenRA Brings C&C: Tiberian Dawn, C&C: Red Alert, and Dune 2000 to Linux](#) [4]

OpenRA is an open source project that recreates and improves upon the classic Command & Conquer and that has C&C: Tiberian Dawn, C&C: Red Alert, and Dune 2000 games in one collection.
