Submitted by Roy Schestowitz on Tuesday 29th of December 2015 11:31:19 AM Filed under [-s](#) [1]

The big story today was the confirmation of hidden features in North Korea's Red Star OS, based on Red Hat/Fedora. It was a top headline on most websites many with plays on the words Open Source and oppressive. In more local circles the release of the first stable Solus OS excited the community and the first reviewer asked where's vi.
