There has been a system in place to help prevent SPAM since the last [major SPAM incident](#) [1], but sometimes we still overlook some SPAM which gets into the front page, taking advantage of our very liberal and open submissions system (to enable participation by the whole community of users). If any spam *still* manages to sneak into the front page (often with pesky JavaScript redirects), please get in contact with us ASAP so that we can take action. Thanks to Christine Hall for the latest headsup. [?](#)
